

Nithin Vincent

Unity Developer | Gameplay Systems & Interactive Audio

nithinvincent371@gmail.com | +91 8139895209 | Thrissur, Kerala, India

github.com/Nithinvincent5209 | linkedin.com/in/nithin-vincent | nithin-vincent-portfolio.vercel.app

Professional Summary

Unity Developer with eight months of professional experience shipping therapeutic rehabilitation software – arcade games and clinical assessment tools – integrated with live patient hardware. Builds gameplay systems end to end in Unity 6 (6000.5.6f1) and Unity 2022.3 LTS, covering procedural generation, physics, object pooling and real-time TCP device bridges, on a foundation of hands-on Wwise 2024.1.6 implementation and an audio engineering diploma.

Technical Skills

Engine & Language C#; Unity 6 (6000.5.6f1, 6000.2.6f2, 6000.0.31f1) and Unity 2022.3 LTS (2022.3.3f1); URP; Input System; NavMesh; Rigidbody and Colliders; Coroutines; ScriptableObject; Animator; object pooling.

Architecture & Systems procedural level generation; game-state and session management; resource and economy systems; UI/UX; TCP socket programming; multithreading; serial device integration; Inno Setup packaging.

Audio, Hardware & Tools Wwise 2024.1.6 build 8842 (Events, RTPCs, Switches, Unity audio engine disabled); pyserial serial-to-TCP bridging; IMU and wrist motion sensors; D-Handle controller coupler and arcade-button input; Git; Visual Studio 2022.

Professional Experience

Unity Developer (Intern), Remap Intelligence Solutions Pvt Ltd

Jan 2026 - Sep 2026

Kochi, Kerala

- Shipped nine Windows applications for a rehabilitation-engineering client – therapeutic arcade games plus clinical grip, pinch and range-of-motion assessment tools – owning gameplay, device integration, packaging and release end to end.
- Built the serial-to-TCP device bridge in Python (pyserial at 115200 baud, automatic USB port detection, thread-safe serial and socket access) that streams live patient movement into Unity over localhost, including a dual-axis variant publishing X and Y to separate channels.
- Built **Block Strike**, a procedural bubble-grid shooter with three difficulty tiers, aim-and-match scoring with combo and floating-text feedback, and motion control through a threaded TCP listener on port 5000.
- Built **Lumber Dash**, a reflex game driven by physical arcade cabinet buttons through a thread-safe TCP server, with streak-based difficulty scaling, parallax scrolling, particle VFX and a tutorial system.
- Built **Galaxy Flex**, a wave-based arcade shooter using a generic object pool for projectiles and meteors, layered parallax backgrounds and wrist-sensor motion steering.
- Packaged every application as an Inno Setup Windows installer for client deployment, including a Galaxy Flex D-Handle controller coupler build.

Projects

Zombie Shooter | Unity 6000.0.31f1, URP, Wwise 2024.1.6

github.com/Nithinvincent5209/Zombie-Escape

- Developed a 3D top-down survival shooter: NavMesh zombie pathfinding, twin-stick eight-directional movement with 360-degree aiming, raycast hit detection, and a central game-state manager tracking objectives and win/loss conditions.
- Implemented audio end to end in Wwise 2024.1.6 – gameplay Events, RTPCs and Switches driven from C#, with the Unity audio engine disabled in favour of Wwise.

UFO Lander | Unity 6000.0.31f1, Wwise 2024.1.6

github.com/Nithinvincent5209/UFO

- Built a Rigidbody flight model simulating gravity, thrust and rotation, tuned for arcade handling, with crash validation on landing speed and angle.
- Created custom particle systems for main and side thrusters plus explosion, over a game-state machine covering Playing, Level Complete and Crashed states.
- Implemented Wwise thruster audio modulated in real time by player input through RTPC.

Education

Bachelor of Computer Applications (BCA), Indira Gandhi National Open University (IGNOU)

Expected 2027

Diploma in Audio Engineering, Pune Seamedu School of Media

2023 - 2024

Certifications

Unity Developer Internship, Remap Intelligence Solutions Pvt Ltd

2026

Certificate in Game Development, Kochi Big Boy School of Gaming

2025

Languages

English | Malayalam
